Key:

- CI - Conservation Importance rating
- Prov. = Biogeographic province
- ER = Ecosystem Richness rating
- SR = Species Richness rating
- IE = Island Endemism rating
- GE = Group Endemism rating
- % = percent endemism
- End = number of Endangered species
- VRI = number of Vulnerable, Rare and Indeterminate species
- Sp Fe = number of Special Features
- NC = Natural Conservation status rating
- Vu = natural Vulnerability rating
- PC = Practicality of Conservation action rating
- Da = reliability of Data rating
- Co PA = Coverage of Protected Areas rating
 (see Appendix for explanation)

RECORDS SELECTED 75

Key:

Plant = number of plant endemic species

Insect = number of insect endemic species

Inv. = number of other invertebrate endemic species (land snails)

R-A = number of Reptile and Amphibian endemic species

Bird = number of bird endemic species

Mam. = number of mammal endemic species

Total = total number of endemic species

% End = average percent endemism

Is. = Island endemism rating

Gr. = Group endemism rating

HI = Human Impact rating

CI = Conservation Importance rating

(see Appendix for explanation)

RECORDS SELECTED 226

Key:

HI = Human Impact rating

Prov. = biogeographic province

Density = human population density (persons per square kilometre)

Trend = rating for rate of population increase

Human Threat = Human Threat rating

Econ Pr = Economic Pressure rating

Urb = urban areas or cities present

(see Appendix for explanations)
